For Immediate Release

Geometric to showcase CAMWorks 2009 and DFMPPro ver 2.0 at SolidWorks World

Scottsdale, Arizona, February 4, 2009: Geometric Technologies, Inc., a subsidiary of [Geometric Limited](#) and an industry leader in developing advanced manufacturing software will showcase the upcoming releases of [CAMWorks®](#) and [DFMPPro](#) at SolidWorks World 2009, at booth #605, in Orlando, Florida from February 8 to 11, 2009. These products are seamlessly integrated within the SolidWorks® platform, and enable intelligence and automation in design and manufacturing.

CAMWorks 2009 has over 100 new features and enhancements for machining faster and more accurately. This release also has significant advances in 3-axis functionality, new features and cutting strategies for 2 to 5 axis milling, turning and wire EDM. CAMWorks, the first CAM solution to offer knowledge-based feature recognition and associative machining capabilities, continuously enhances its features in line with customer needs, and to better integrate with the SolidWorks platform. For more information on CAMWorks, please visit www.camworks.com.

Version 2.0 of DFMPPro for SolidWorks provides users with additional checks to validate the design for sheet metal parts resulting in stronger parts, and longer die and punch life of the sheet metal model. This version of the design for manufacturability tool supports DFM analysis on an assembly, allowing the user to analyze all the parts in an assembly in a single execution, thus saving time. DFMPPro 2.0 generates 3D reports as eDrawings files for easier offline analysis, where problem areas are highlighted and corresponding analysis details are provided in the file itself. For a free trial version of DFMPPro, please visit <http://dfmpro.geometricglobal.com>.

The team from Geometric will be making two presentations at the event:

- “Automation – CAMWorks Automating CAM” at the Certified Partner Theater on Sunday, February 8, at 6:30 p.m., where Mike Sours , Director IT, Support and Services , will demonstrate the latest features in CAMWorks and a case study on J & L Tooling.
- “Get your machined and sheet metal parts ready for manufacturing with DFMPXpress and DFMPPro” on Monday February 9 , at 1:30 p.m. in room # Swan 9/10.

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 4.86 billion (US Dollars 121.6 million) for the year ended March 2008. It employs close to 3000 people across 10 global delivery locations in the US, France, Romania, India, and China. Geometric is assessed at SEI CMMI Level 5 for its software services and ISO 9001:2000 certified for engineering operations.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro and GeomCaliper®. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.

For further details about Geometric's DPT business unit, please visit www.geometricglobal.com/products or call +1.480.367.0132
