PARTcommunity – The Engineering Accelerator for CAMWorks Users

Geometric's partnership with CADENAS enables access to millions of CAD models

Scottsdale, Arizona and Mumbai, India, December 1, 2010: [Geometric](#), a leader in developing advanced manufacturing software, has entered into an agreement with leading part catalogue provider CADENAS, granting the users of Geometric's intuitive CAM solution, [CAMWorks](#) access to CADENAS's CAD model library.

CAMWorks users will now be able to download millions of ready-to-use 3D CAD models by exploring the CAMWorks PARTCommunity, saving time and effort in creating fresh models.

CAMWorks is an intuitive solids based CAM solution that helps manufacturers increase productivity and profitability through best-in-class technologies and adaptable automation tools that maximize machining efficiencies, and are yet simple to use. This collaboration is another step towards increasing the automation that CAMWorks brings to its users through pre-designed part library.

“Over the last ten years, CAMWorks has continually improved the level of automation and time-to-market for our customers. We are always on the lookout for partners that can further increase productivity and efficiency for our customers. This agreement with Cadenas, adds a very valuable partner in our effort to give the best to CAMWorks users”, said Sunil Palrecha, Product Marketing and Sales Director, Geometric Americas, Inc.

Simple engineering in the digital age

CAMWorks® with Machining Intelligence is the most advanced CAM programming software available for getting products to market faster, more efficiently and within budget. CAMWorks is a next generation best-of-class CNC programming solution for machining parts from solid models.

With CAMWorks, engineers can conveniently produce molds from 3D solid models and, with the new PARTcommunity download portal, manufacture their constructions quickly and easily.

The PARTcommunity download portal by Geometric Technologies can be found at:

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 5.12 billion (US Dollars 108.1 million) for the year ended March 2010. It employs close to 3000 people across 11 global delivery locations in the US, France, Romania, India, and China. Geometric was assessed as CMMI 1.1 Level 5 for its software services and is ISO 9001:2008 certified for engineering operations.

Geometric's Desktop Products and Technologies (DPT) business develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPRO, GeomCaliper® and 3DPaintBrush™. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
