

## Media Release

**Geometric Limited**

**Regd. office:** Plant 6 Pirojshanagar  
Vikhroli (West) Mumbai 400 079 India

Tel + 91.22.67056500

Fax + 91.22.67056891

For Immediate Release

---

### **Geometric to demonstrate CAMWorks 2010 and DFMPPro version 2.1 at DieMould India 2010**

**Mumbai, India, March 04, 2010:** [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in Product Lifecycle Management (PLM), Engineering services and Offshore Product Development (OPD) solutions and technologies, will demonstrate machining automation with its leading products - [CAMWorks®](#) and [DFMPPro](#) at Booth #A28 at DieMould India 2010 to be held at the Bombay Exhibition Centre, Goregaon in Mumbai, India from March 18-21, 2010.

“DieMould India offers a great platform to communicate directly with toolmakers and manufacturers, and to showcase how they can improve their productivity by using intelligent automation tools like Geometric’s – CAMWorks and DFMPPro”, said Sambit Pradhan, Business Development Manager, Desktop Products, Geometric.

CAMWorks’ pioneering feature based machining and innovative knowledge based machining technology, TechDB™ (Technology Database) are designed to significantly reduce the time required to generate machining strategies and processes for Tool and Die Industry. The technology database automatically associates tooling, operation strategies, and machining parameters to the features. To further enhance the automation process, the knowledge-based rules in the TechDB are fully customizable to apply company’s best practices.

DFMPPro facilitates mold designers and manufacturing engineers to do upstream manufacturability validation and identification of areas of a design that are difficult, expensive or impossible to manufacture; thereby, reducing rework with a view to minimize costs of production and time to market without compromising on the product quality.

Geometric will be demonstrating the latest versions of these two products, CAMWorks 2010 and DFMPPro version 2.1 at the event:

- CAMWorks 2010 has over 50 new features and advancements for machining faster and more accurately. This release also has significant advances in 3 axis functionality, as well as new features and cutting strategies for 2 to 5 axis milling, turning, and wire EDM. CAMWorks, the first CAM software to offer knowledge-based feature recognition and associative machining capabilities, continuously enhances its features in line with customer feedback and requirements, and to better integrate with the SolidWorks platform. For more information on CAMWorks, please visit [www.camworks.com](http://www.camworks.com).
- DFMPPro version 2.1 adds an [injection molding module](#) packed with important best industry-

wide rules for ensuring manufacturability of injection molded components. The rules cover draft analysis, undercuts, mold wall thickness, ribs, and bosses, amongst others. CAD users will be able to quickly verify their designs within ProENGINEER, and SolidWorks, thus reducing cost and time-to-market, while also improving the quality of manufactured parts. DFMPPro also facilitates collaborative design review process by generating comprehensive 3D reports in eDrawings format. This capability is very useful for suppliers who can quickly generate eDrawings reports and share it with the OEM for their review, comments and acceptance. For more information on DFMPPro, and how it helps in create designs right the first time, visit [www.dfmpro.com](http://www.dfmpro.com)

### **About Geometric**

Geometric ([www.geometricglobal.com](http://www.geometricglobal.com)) is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 5.98 billion (US Dollars 129.47 million) for the year ended March 2009. It employs close to 3000 people across 11 global delivery locations in the US, France, Romania, India, and China. Geometric is assessed at SEI CMMI Level 5 for its software services and ISO 9001:2000 certified for engineering operations.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro, GeomCaliper® and 3DPaintBrush™. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.

For further details about Geometric's DPT business unit, please visit [www.geometricglobal.com/products](http://www.geometricglobal.com/products) or call +1.480.367.0132
