For immediate release

Geometric to display automation solutions for design and machining at SolidWorks World 2012

Will showcase its design for manufacturability tool, DFMPPro; and intelligent machining products, CAMWorks and CAMWorksXpress

Scottsdale, Arizona, January 31, 2012: [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in Product Lifecycle Management (PLM), Global Engineering Services and Offshore Product Development (OPD) solutions and technologies, will showcase the latest release of its solid-based CNC programming solution, [CAMWorks®](#) 2012, along with its new 2.5D CAM package, [CAMWorksXpress®](#), and [DFMPPro](#), at the [SolidWorks World 2012](#), booth #524, San Diego Convention Center, from February 12-15, 2012 in San Diego, CA, USA.

Attendees will have the opportunity to see live demonstrations of all three solutions and connect with the company's engineers during the three day event. Marc Bissell, Sr. Applications Engineer, Geometric will also present on 'Integrated Design and Manufacturing – From Orders to Parts' at the Certified Partner Theater on Tuesday, February 14, at 1:00 p.m.

The company will showcase:

- **CAMWorks 2012:** CAMWorks 2012 supports SolidWorks 2012, and contains improvements in the functionality to enable faster and easier programming, and to produce more efficient tool paths for improved machining productivity. CAMWorks 2012 now includes a new Nesting add-on, which is integrated within SolidWorks to create optimized nested layouts of Parts or Assemblies. Using CAMWorks Nesting a user can select Single/Multiple sheets, specify the part-to-part distance and sheet margin/collar. *For more information on CAMWorks 2012, please visit www.camworks.com.*
- **CAMWorksXpress:** CAMWorksXpress is an ideal solution for programmers and machinists, as well as new users, who are looking for an easy to learn and easy to use 2.5D machining CAM package. CAMWorksXpress is a powerful yet inexpensive tool that runs seamlessly inside SolidWorks and provides the high-powered features required for machining efficiently. *For more information about CAMWorksXpress, please visit www.camworksexpress.com*
- **DFMPPro:** DFMPPro is a unique and easy to use tool for the validation of the manufacturability of a designed product. By checking models for manufacturability upfront, DFMPPro helps engineers address the problem of repetitive design revisions. It also helps quickly validate designs based on best practices. The new Casting capabilities of the product will be showcased at the event, along with the existing checks for Injection Molding, Sheet Metal, and Machining. *For more information on DFMPPro, please visit www.dfmp.com*

About SolidWorks World

SolidWorks World is an annual event for users of the CAD platform, to gather ideas and insights for working more effectively, and for program partners to exhibit and demonstrate their products and developments. <http://www.solidworks.com/sww>

About Geometric

Geometric (www.geometricglobal.com) is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 5.12 billion (US Dollars 108.1 million) for the year ended March 2010. It employs close to 3000 people across 11 global delivery locations in the US, France, Romania, India, and China. Geometric was assessed as CMMI 1.1 Level 5 for its software services and is ISO 9001:2008 certified for engineering operations.

Geometric's Geometry Technology Solutions (GTS) business develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro, GeomCaliper®, 3DPaintBrush™ and CAMWorksXpress. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
