## Geometric's DFMPro™ now enables users to add Design for Manufacturability (DFM) rules in-house

*Organizations can now automate the capture and implementation of their DFM rules*

**Mumbai, India. April 22, 2008**

Geometric Ltd., a leader in Product Lifecycle Management (PLM) solutions and technologies, today announced the release of **DFMPro™ 2008 EX**, an integrated tool on SolidWorks® which helps to get ***designs right the first time***. Organizations can now easily add their own DFM checks and rules to automate in-house DFM practices into their standard operating procedures.

DFMPro is a revolutionary "Design for Manufacturability" product for designers and manufacturing engineers to facilitate upstream manufacturability validation and identification of design areas that are difficult, expensive or impossible to manufacture. DFMPro allows quick and in-depth examination of product manufacturability. DFMPro Xpress, a lighter version of DFMPro is shipped with every seat of SolidWorks 2008.

DFMPro 2008 EX, the latest release of DFMPro, permits organizations to build their own custom rule libraries easily and quickly. Basic knowledge of Visual Basic (VB) scripting or SolidWorks macro languages is adequate to build custom rules. DFMPro 2008 EX now also supports easy sharing of manufacturability knowledge across departments, suppliers and vendors, thus improving their efficiency by reducing manufacturability issues. Advanced customization on the product can be provided by DFMPro product resellers, and also directly from Geometric.

DFMPro 2008 EX has also been enhanced with additional out-of-the-box rules for machining and sheet metal fabrication processes.

A limited period trial version of DFMPro 2008 EX is available at [www.dfmpro.com](http://www.dfmpro.com).

**END OF RELEASE**

## **About Geometric**

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM), enable companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Geometric was incorporated in 1994 and is headquartered in Mumbai, India. It is listed on the Bombay Stock Exchange (BSE: 532312) and the National Stock Exchange (NSE: GEOMETRIC) in India. The company recorded revenues of 4.86 Billion Rupees (121.6 Million US Dollars) for its consolidated operations for the year ending March 2008.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The unit includes Phoenix AZ-based business subsidiary, Geometric Technologies, Inc., formerly TekSoft, Inc., which has over 25 years in progressive product innovation. It develops and markets CAMWorks®, a SolidWorks® certified Gold CAM product, besides marketing and distributing Geometric's products and technologies.

The end-user products from Geometric include CAMWorks, eDrawings Publisher, DFMPPro and GeomCaliper®. eDrawings Publisher is a lightweight intuitive collaboration tool for 3D models that enables publishing of 3D model from all major CAD systems. DFMPPro is an automated intuitive tool for designers to accurately predict the manufacturability of models. GeomCaliper is an integrated, automated and easy to use thickness checker for 3D CAD models.

The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
