Geometric releases Feature Recognition version 15.5 New enhancements strengthen design and manufacturing productivity

MUMBAI, India. May 07, 2007

Geometric Software Solutions, a leader in Product Lifecycle Management (PLM) services and technologies, today announced the release of Feature Recognition Library version 15.5 with significant new enhancements in milling, turning, and sheet metal capabilities.

These enhancements include:

- Milling and drilling : Support for C-axis feature recognition
- Sheet metal feature recognition : Unfolding conical shaped tubes and tubes with split faces
- Turning (axi-symmetric) : Performance enhancement of feature recognition
- Machining Optimization : Improved recognition of intersecting features that can be machined from the same starting level
- 64-bit support

Detailed information is available at <http://feature.geometricsoftware.com>

About Feature Recognition

Feature Recognition Technology is a mature, patented technology from Geometric Software Solutions Co. Ltd. This technology enables intelligent extraction of valuable data from the CAD models, reuse of existing CAD information, and analysis and automation of manufacturing process; thereby resulting in an overall improvement in productivity.

Feature Recognition finds application in Data Translation, Design For Manufacturability (DFM), Finite Element Analysis (FEA), Machining, Process Planning and Cost Estimation. Essentially Feature Recognition creates smart information out of dumb solid models for use in downstream applications.

Availability

Feature Recognition library is available on ParaSolid v17, ACIS v15, v16 geometry kernels; and SolidWorks® 2006/2007. It can also be ported over other modelers and proprietary geometry kernels on demand. Please visit <http://feature.geometricsoftware.com> to download the evaluation version.

About Geometric Software Solutions

Geometric Software Solutions Co. Ltd. is a leading company in the fast growing engineering services and PLM segment. Geometric is a CMMI Level 5 company with over 20 years of experience in CAD/CAM/CAE, PDM and MPM.

Partnerships with major PLM vendors such as Dassault Systèmes, UGS, and MatrixOne offer Geometric the unique advantage of providing cost effective services on leading PLM platforms. Geometric offers services based on SolidWorks®, CATIA®, ENOVIA™, DELMIA™, eMatrix™, Teamcenter Enterprise®, Windchill®, and other leading CAD/ CAM/ CAE/ PDM software platforms. TekSoft, Inc., a subsidiary of Geometric, is a leading developer and supplier of innovative, automated CAD/CAM software solutions for the manufacturing industry. Modern Engineering, another US based subsidiary, acquired in November 2006, has been providing engineering services for the automotive and industrial sectors for over 60 years. Modern's expertise includes program management, product design and engineering, manufacturing engineering including tool and rack design, supply chain engineering and data management.

The company is traded on both the Bombay (BSE: 532312) and the National (NSE: GEOMETRIC) stock exchanges in India.
