Geometric releases GeomCaliper® version 2.2

New features include performance optimization for multi-core machines

Mumbai, India, July 15, 2008: [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in Product Lifecycle Management (PLM) solutions and technologies, today announced the release of 2.2 version of 'GeomCaliper® for CATIA® V5' and 'GeomCaliper for Pro/ENGINEER®' products, with enhanced features primarily related to performance improvement.

Major advancements in this release of GeomCaliper for CATIA V5 and Pro/ENGINEER include:

- Code optimization to leverage the computation power of multi-core machines, resulting in a reduction of computation time by approximately 30% on dual core machines as compared to single core machines
- Critical region analysis functionality added to '2D Thickness at Section' and '3D Thickness at Section' tools
- Allows configuration of the thickness color band settings, ensuring every subsequent computation uses the same minimum-maximum values, interval number, pre-chosen band colors, etc.
- 'Outside Range' option in section thickness tools lets users view thickness outside the predetermined range
- New 'GeomCaliper License Manager' tool added making license configuration easy

GeomCaliper for Pro/ENGINEER now also supports Pro/ENGINEER Wildfire 4.0 release.

A free 15-day trial version of GeomCaliper for CATIA and Pro/ENGINEER platforms can be downloaded free of cost from <http://geomcaliper.geometricglobal.com/>

For pricing details and purchase options please contact: gc.sales@geometricglobal.com

GeomCaliper is an innovative tool that facilitates measurement and checking of wall thickness of 3D CAD models. It accelerates the design review process for manufacturability, enabling faster prototyping and production of designs. Unlike traditional measurement tools, GeomCaliper is fast and easy to use.

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 4.86 billion (US Dollars

121.6 million) for the year ended March 2008. It employs close to 3000 people across 10 global delivery locations in the US, France, Romania, India, and China. Geometric is assessed at SEI CMMI Level 5 for its software services and ISO 9001:2000 certified for engineering operations.

Geometric's Desktop Products and Technologies (DPT) business unit develops cutting-edge point productivity solutions that enhance design and improve manufacturing operations. The end-user products from Geometric include CAMWorks®, eDrawings® Publisher, DFMPPro and GeomCaliper®. The key technologies from Geometric are NestLib®, Feature Recognition (FR), GeomDiff and 3DSearchIT®. Geometric licenses these technologies to OEM partners and also designs and implements customized process solutions using these technologies for industrial customers.
